

Project Name: Pension Problem in Mainland China

Github Link: https://hoppipollatao.github.io/Pension_Problem_In_China/

Members: Yangjie Tao, Bo-Syun Liao, Yueting Chen.

Contribution:

Yangjie Tao:

I completed the left part of the visualization: created the geomapping, added the color legends and slider, finished multi-line chart and then achieved the interaction between the geomapping and the multi-line chart.

Bo-Syun Liao:

I completed the upper right part of visualization : created the population pyramid, add the tooltip to highlight and show information of each age group, add animation change function button to switch the year.

Yueting Chen:

I finished the lower right part of the visualization: created the prediction line chart, colored the grid line which represented '0' with red, and created the gradual color change line to highlight the change in the future.
